11-Port Gigabit Ethernet Switch with 8-Port PoE

Introduction

The 11-port Gigabit PoE switch, uses high-quality, high-speed network IC and the most stable PoE chip. It can provide seamless connectivity on 10/100/1000M Ethernet network. The latest AI function is integrated into the switch - PoE Watchdog and QoS. The PoE power supply port automatically detects and supplies power to the powered devices that comply with the IEEE802.3af or IEEE802.3at standards. Non-poe devices do not automatically detect power supply and only transmit data.

Key Features

- 8*10/100/1000M POE ports + 2* gigabit RJ45 ports + 1*gigabit SFP port
- Comply with IEEE 802.3, IEEE 802.3u, IEEE802.3ab ,IEEE802.3z IEEE802.3x standards
- Ethernet port supports 10/100/1000M adaptive
- Flow control mode: full-duplex adopts IEEE 802.3x standard, half-duplex adopts Back pressure standard
- Support PoE Watchdog and QoS function

11-Port Gigabit Ethernet Switch with 8-Port PoE

- Support port auto-flip (Auto MDI/MDIX)
- Automatically supplied to adaptive devices
- Panel indicators monitor operating status and help with fault analysis
- Support for VLAN mode, Default mode and Extend mode

Application Environment

- Metro optical broadband network: data network operators such as telecommunications, cable TV, and network system integration,etc.
- Broadband private network: suitable for financial, government, oil, railway, electric power, public security, transportation, education and other industries
- Multimedia transmission: integrated transmission of images, voice and data, suitable for remote teaching, conference TV, videophone and other applications
- Real-time monitoring: simultaneous transmission of real-time control signals, images and data
